

'How It Works 6 – Digitalisation'

CALL FOR PAPERS

Elevatori Magazine, the historical international vertical transport magazine by Volpe Editore, is working on the new volume of the 'How it works' series: **'How it works 6 – Digitalisation'**. This volume will be entirely dedicated to the new frontier of **digitalisation of vertical transport systems and components**.

As in the past, Volpe Editore intends to avail itself of the valuable technical collaboration of experts from companies belonging to important associations and consortiums and, hereby, addresses these realities with the aim of collecting editorial contributions pertaining to the aforementioned topic, i.e. articles on studies, projects, processes, prototypes, products or services developed by companies and concerning digitalisation.

The articles received in the editorial office will be screened by the members of the Technical Committee of Elevatori Magazine, experts in the field, and will be collected in a special bilingual (**English and Italian**) publication.

This special publication will be presented on the occasion of Interlift 2023 (17-20 October) and will subsequently be distributed together with the magazine during all the most important international events in the sector. It will also be available for purchase online.

HOW TO PARTICIPATE IN THIS PUBLISHING INITIATIVE

By 07/4/2023: expression of interest in taking part in the initiative, **by sending an e-mail** to the address: maddalena.parotelli@elevatori.eu, **with the subject: 'HOW IT WORK 6 – DIGITALISATION'** and containing an abstract of the contents/topics to be developed.

By 07/5/2023: send the final full text, written in **English language**, to the e-mail address: maddalena.parotelli@elevatori.eu.

Editorial rules:

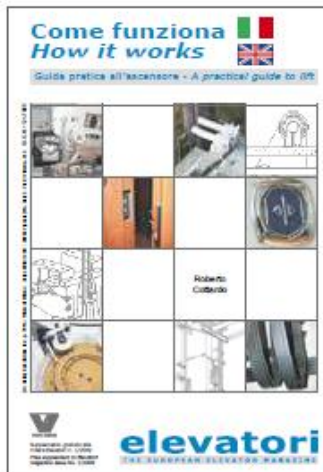

- **Languages: the text may be produced in English;**
- **Text length: min. 6,000 - max 8,500 characters (including spaces);**
- **Text format: .doc (word);**
- **The text will be subject to editing;**
- **Images, graphics and drawings:**
 - minimum number: 3;
 - format: Jpeg, Tiff, Eps, Pdf, Dwg in high resolution (300 dpi);
 - all images and graphics must be complete with Copyright © and authorisation for publication;
 - all images must be complete with captions;
- **Authors' signatures: name&surname + company (without logo) and role;**
- **Biography of each author: 400 characters (including spaces) each author;**
- **Photograph of each author: high resolution (see above).**

Trademarks and advertising contents included in the text are not permitted. All the final full texts will be submitted to the Elevatori Magazine Technical Committee for approval.

Companies wishing to **purchase advertising space in the volume** may contact **Silvio Arati**: silvio.arati@elevatori.eu - 348/8747917.

'How it works'

'How It Works' is a special project created by Elevatori magazine and launched in 2008 with great success among Italian and international sector operators. It is a agile technical guide for those professionally involved in vertical transportation. Over the years, thanks to collaboration with a number of sector associations, this technical guide has been transformed into a multilingual (Italian, English, German, Chinese, Turkish and Hindi) publishing series. All the volumes in the series have been printed and distributed in more than 180,000 copies at the most important lift trade fairs around the world (as well as at assemblies of national and international associations, training courses, meetings and events dedicated to the world of real estate, architecture, and construction).
